

LINKED LIST

LINKED LIST

Why Linked List?

ARRAY V/S LINKED LIST

Arrays	Linked List
Maximum capacity of the array should be known beforehand.	Memory can be changed at the time of usage according to our need.
Insertion and deletion is costlier, means we have to swap other elements.	Insertion and deletion is very easy in linked list.

LINKED LIST

What is a Linked List?

Linked Lists are similar to arrays but they are not stored in continuous manner in memory like arrays and their respective nodes are connected by using pointers.

LINKED LIST

A complete Linked List looks something like this.

LINKED LIST

Insertion in Linked List:-

Let's take this as a linked list

Head

LINKED LIST

Insertion in Linked List:-

We have three options to insert

Head

LINKED LIST

Insertion in Linked List:-

Let's say we want to insert a node with value 30 in the beginning

Head

LINKED LIST

Insertion in Linked List:-

So we can simply make a link from 30 to 10 and change Head pointer to node 30

Head

LINKED LIST

Insertion in Linked List:-

So we can simply make a link from 30 to 10 and change Head pointer to node 30

Head

LINKED LIST

Insertion in Linked List:-

So we can simply make a link from 30 to 10 and change Head pointer to node 30

LINKED LIST

Insertion in Linked List:-

Now let's say we want to insert a node after 20

Head

LINKED LIST

Insertion in Linked List:-

Here we can remove link between 20 and 40
and make it from 20 to 30 and then 30 to 40

Head

LINKED LIST

Insertion in Linked List:-

Here we can remove link between 20 and 40
and make it from 20 to 30 and then 30 to 40

Head

LINKED LIST

Insertion in Linked List:-

Something like this

Head

LINKED LIST

Insertion in Linked List:-

Now if we want it to insert at the end
then we can simply create a link from 50
to 30 make next pointer of 30 as NULL

Head

LINKED LIST

Insertion in Linked List:-

Now if we want it to insert at the end
then we can simply create a link from 50
to 30 make next pointer of 30 as NULL

Head

LINKED LIST

Insertion in Linked List:-

It will look like this

Head
